San Antonio, TX 78203

Dear Dr. Williams Loston,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's request for initial accreditation was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following program has been granted accreditation with a report and visit due in 2027. This report must address the areas of partial compliance identified in the Visiting Team Report. The relevant ATMAE (2024) standards are: 1,2,3,4,6,10,11,12.

- AAS: Biomedical Engineering Technology

The program is accredited through 2029, with eligibility for reaccreditation at that time. While ATMAE will provide reminders to support your planning, we ask that you keep us informed of any changes to the program or key accreditation contacts.

We appreciate your commitment to meeting ATMAE's accreditation requirements and encourage you to celebrate this important achievement with your students, faculty, and community. Displaying the "Accredited by ATMAE" logo on your program's website, and promotional materials is an excellent way to highlight your program's quality and commitment to excellence. The logo is available for download at https://link.atmae.org/accredlogo.

Congratulations to you and your team. We look forward to your continued success.

Sincerely,

Amy Good

Dear Dr. Perez,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's two-year progress report and follow-up visit report were reviewed and considered for the following programs:

- BS-Advanced Manufacturing and Applied Robotics
- BS-Concrete Industry Management

On behalf of the Board, I am pleased to inform you that the BS-Concrete Industry Management program has been granted accreditation with no further action required, having satisfactorily met all ATMAE standards.

The BS-Advanced Manufacturing and Applied Robotics program has been granted continued accreditation with an additional progress report due in one-year. This report must address the ATMAE (2021) standard that remains in partial compliance, Standard 16.

The programs are accredited through 2027, with eligibility for reaccreditation at that time. This recognition reflects your strong commitment to academic quality, continuous improvement, and alignment with ATMAE's high standards.

Please note that it is the institution's responsibility to maintain full compliance with ATMAE accreditation standards throughout the accreditation period and keep ATMAE informed of any program changes or updates to key accreditation contacts.

We encourage you to celebrate this important achievement with your students, faculty, and community. Displaying the "Accredited by ATMAE" logo on your program's website, and promotional materials is an excellent way to highlight your program's quality and commitment to excellence. The logo is available for download at https://link.atmae.org/accredlogo.

Congratulations to you and your team on this well-deserved recognition. We look forward to your continued success.

Dr. Saul Jimenez Sandoval, President
California State University – Fresno
5241 N. Maple Ave.
Fresno, CA 93740

Dear Dr. Jimenez Sandoval,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025. Your institution's progress report was among those reviewed and considered.

On behalf of the Board, I am pleased to inform you that both programs have been granted continued accreditation, with an additional progress report due in 2026. This report must address the ATMAE (2021) standards that remain in partial compliance as listed below:

Program	2021 Standards
BS-Industrial Technology	4,10,14,15,16,18,19
MS-Industrial Technology	4,6,10,14,15,16,18,19

To support your institution in achieving full compliance, the Board recommends engaging a qualified consultant. Working with a consultant can help ensure that all standards are fully met and that your programs are positioned to demonstrate complete compliance in the 2026 progress report.

Both programs will remain accredited through 2029, provided that the 2026 progress report demonstrates that full compliance has been achieved. Failure to do so may result in Board action at that time.

We will provide reminders to assist with your planning; however, we ask that your team keep ATMAE promptly updated on any changes to accredited programs or key contacts for accreditation matters.

We sincerely appreciate your continued dedication to meeting ATMAE's accreditation standards. If you have any questions regarding the Board's decision or the expectations for the 2026 progress report, please do not hesitate to contact us. We look forward to supporting your efforts to achieve full compliance in the coming year.

Sincerely,

Amy Good

E. 5th Street, Spilman Building
Greenville, NC 27858

Dear Dr. Rogers,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's request for reaccreditation was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following programs have been granted accreditation with a report due in 2027. This report must address the areas of partial compliance identified in the Visiting Team Report. The relevant ATMAE (2024) standards for all programs are: 1, 2.

- BS: Design
- BS: Distribution and Logistics
- BS: Industrial Engineering Technology
- BS: Industrial Technology
- BS: Information and Cybersecurity Technology
- MS: Information and Cybersecurity Technology
- MS: Technology Management

These programs are accredited through 2031, with eligibility for reaccreditation at that time. While ATMAE will provide reminders to support your planning, we ask that you keep us informed of any changes to the programs or key accreditation contacts.

At the request of your program administration, the concentrations within these programs were not reviewed and therefore are not accredited. All references to accreditation must clearly indicate that only the base programs are accredited. This requirement applies to all marketing and promotional materials, including catalogs and websites.

We appreciate your dedication to meeting ATMAE's accreditation requirements and encourage you to celebrate this important achievement with your students, faculty, and community. Displaying the "Accredited by ATMAE" logo on your program's website and promotional materials is an excellent way to highlight your program's quality and commitment to excellence. The logo is available for download at https://link.atmae.org/accredlogo.

Congratulations to you and your team on this accomplishment. We look forward to your continued success.

Dear Dr. Hoggard,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's request for reaccreditation was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following programs have been granted accreditation with a report due in 2027. This report must address the areas of partial compliance identified in the Visiting Team Report. The relevant ATMAE (2024) standards are as listed below:

Program	2024 ATMAE Standards
AAS: Drafting and Design Technology	9
AAS: Industrial Instrumentation Technology	9
AAS: Process Technology	4, 9

The programs are accredited through 2031, with eligibility for reaccreditation at that time. While ATMAE will provide reminders to support your planning, we ask that you keep us informed of any changes to the program or key accreditation contacts.

We appreciate your commitment to meeting ATMAE's accreditation requirements and encourage you to celebrate this important achievement with your students, faculty, and community. Displaying the "Accredited by ATMAE" logo on your program's website, and promotional materials is an excellent way to highlight your program's quality and commitment to excellence. The logo is available for download at https://link.atmae.org/accredlogo.

Congratulations to you and your team. We look forward to your continued success.

Sincerely,

Amy Good

Dear Dr. Sorenson,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's one-year progress report was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following programs have been granted continued accreditation, with an additional progress report due in 2026. This upcoming report must address the ATMAE (2021) standards that remain in partial compliance for both programs, Standards 5, 13, 14, 15, and 16.

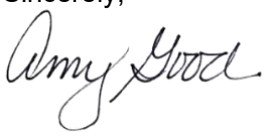
- AAS: Computer Information Technology – Cyber Security
- AAS: Computer Information Technology – Systems Analysis & Programming

Both programs remain accredited through 2027, provided that the 2026 progress report demonstrates that full compliance has been achieved. Failure to reach full compliance may result in Board action at that time.

We will send reminders to support your planning; however, we ask that your team keep ATMAE updated on any changes to accredited programs or key contacts for accreditation matters.

We appreciate your continued commitment to meeting ATMAE's accreditation requirements. If you have any questions regarding the Board's decision or the expectations for the 2026 Progress Report, please do not hesitate to contact us. We look forward to reviewing your continued efforts to achieve full compliance with the ATMAE standards.

Sincerely,



Amy Good

Dear Dr. Somerville,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's one-year progress report was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following programs have been granted continued accreditation, with an additional progress report due in 2026. This report must address the ATMAE (2021) standards that remain in partial compliance for all programs, Standards 13, 15.

- AAS: CAD Technology
- AAS: Caterpillar Dealer Service Technician
- AAB: Computer Programming Technology
- AAS: Computer Science
- AAS: Electrical/Electronics Engineering Technology
- AAS: Information Systems Technology
- AAB: Networking and Information Systems Support
- AAS: Wide Area Networking Technology

The programs remain accredited through 2027, provided that the 2026 progress report demonstrates that full compliance has been achieved. Failure to reach full compliance may result in Board action at that time.

We will send reminders to support your planning; however, we ask that your team keep ATMAE updated on any changes to accredited programs or key contacts for accreditation matters.

We appreciate your continued commitment to meeting ATMAE's accreditation requirements. If you have any questions regarding the Board's decision or the expectations for the 2026 Progress Report, please do not hesitate to contact us. We look forward to reviewing your continued efforts to achieve full compliance with the ATMAE standards.

Dear Ms. Dreyfus,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's request for reaccreditation was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following programs have been granted accreditation with a report and visit due in 2027. This report must address the areas of partial/non-compliance identified in the Visiting Team Report. The relevant ATMAE (2024) standards for all programs are as listed.

Program	**2024 Standards**
AS: Automotive Technology	1,2,4,8,9,11,12
BS: Automotive Technology	1,2,3,4,5,8,9,11,12
AS: Advanced Engine Performance	1,2,4,8,9,11,12
AS: Alternative Fuels and Advanced Transportation Technology	1,2,4,8,9,11,12
AS: Electric Vehicle and Fuel Cell Technology Technician	1,2,4,8,9,11,12
AS: Honda Professional Automotive Career Training – PACT	1,2,4,8,9,11,12

To support your institution in achieving full compliance, the Board recommends engaging a qualified consultant. Working with a consultant can help ensure that all standards are fully met and that your programs are positioned to demonstrate complete compliance.

The programs are accredited through 2030, with eligibility for reaccreditation at that time. While ATMAE will provide reminders to support your planning, we ask that you keep us informed of any changes to the program or key accreditation contacts.

We appreciate your commitment to meeting ATMAE's accreditation requirements and encourage you to celebrate this important achievement with your students, faculty, and community. Displaying the "Accredited by ATMAE" logo on your program's website, and promotional materials is an excellent way to highlight your program's quality and commitment to excellence. The logo is available for download at https://link.atmae.org/accredlogo.

Congratulations to you and your team. We look forward to your continued success.

Dear Dr. Taylor,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025, during which your institution's request for reaccreditation was reviewed and considered.

On behalf of the Board, I am pleased to inform you that the following program has been granted accreditation with a report due in 2027. This report must address the areas of partial compliance identified in the Visiting Team Report. The relevant ATMAE (2024) standards are: 8, 10.

- AAS: Drafting and Design Technology
- AAS: Instrumentation and Electrical Technology
- AAS: Process Technology

The programs are accredited through 2031, with eligibility for reaccreditation at that time. While ATMAE will provide reminders to support your planning, we ask that you keep us informed of any changes to the program or key accreditation contacts.

We appreciate your commitment to meeting ATMAE's accreditation requirements and encourage you to celebrate this important achievement with your students, faculty, and community. Displaying the "Accredited by ATMAE" logo on your program's website, and promotional materials is an excellent way to highlight your program's quality and commitment to excellence. The logo is available for download at https://link.atmae.org/accredlogo.

Congratulations to you and your team. We look forward to your continued success.

Sincerely,

Amy Good

Dr. Renu Khator, President
University of Houston
4302 University Drive
Room 212
Houston, Texas 77204-2018

Dear Dr. Khator,

The ATMAE Board of Accreditation conducted its annual accreditation hearings on October 22, 2025. During the scheduled hearings, your institution's request for reaccreditation was tabled due to the absence of a representative. As previously communicated, ATMAE requires a representative to be present when accreditation decisions are made. The Board was concerned by the lack of prior notice regarding this absence.

Following the hearings, Dr. Maria Burns graciously stepped forward to represent the institution in a virtual meeting on October 30, 2025. Her professionalism, dedication, and commitment ensured a timely and productive meeting which allowed the Board to move forward in evaluating your programs. We sincerely commend her efforts.

On behalf of the Board, I am pleased to inform you of the following outcomes:

- **BS-Biotechnology** – granted accreditation, having satisfactorily met all ATMAE standards.
- **BS-Technology Leadership and Innovation Management** – granted accreditation, having satisfactorily met all ATMAE standards.
- **BS-Supply Chain & Logistics Technology** – granted accreditation, with a report due in 2027. This report must address the areas of partial compliance identified in the Visiting Team Report. The relevant ATMAE (2024) standards are 5 and 10.

These programs are accredited through 2031, with eligibility for reaccreditation at that time. While ATMAE will provide reminders to support your planning, we ask that you keep us informed of any changes to the programs or key accreditation contacts.

To address the Board's concern regarding the absence of representation, the Board requests that the University provide a written statement confirming that a representative will attend all future Board hearings when accreditation decisions are made for these programs. This will help ensure that accreditation decisions are conducted efficiently and that the University's programs are fully represented throughout the review process.
